

chief executive officer

- **Ensure strong representation for the sector**
- **Build organisational profile and reputation**

The Brain Injury Association of NSW is a peak health body with the primary role of representing this core issue to government, service providers and the broader community through systemic advocacy and lobbying.

Reporting to the Board you will manage a staff of six to ensure the implementation of the association's strategic direction. You will also lead policy and service development and will be responsible for managing the business and resources of the organisation, including all funding requirements. Managing external relationships and engagement with members, key policy makers and service providers will be another crucial aspect of your role.

Ideally you have a track record in management and leadership of community based organisations and the ability to professionally represent this health issue at all levels. You are experienced in drafting funding and policy submissions and have the proven capacity to manage all reporting and legal requirements for an NGO. Experience in grassroots and systemic advocacy and project development, ideally in the disability sector, is also highly desired. You may also be from the government or corporate sectors.

If you would like to provide a powerful voice for this key health issue then please contact Olivia Ryan on 02 8243 0570 or email your resume to ngo_6050@ngorecruitment.com
