

business development manager

- **Australia's Leading PV Installation Business**
- **Join a Small and Motivated Team**

The company is an innovative leader in renewable energy supplying solar photovoltaic systems (PV) to residential areas and retirement villages Australia-wide. The company manages 20% of the Australian residential PV market and installs 1000 systems every month!

You will spend 3 weeks per month at the office to do business development (marketing, sales and telemarketing), and 1 week per month to visit the customers and develop potential customers. The technology is well known and accepted, and the Australian solar PV industry offers long term potential with great rebates provided by the state and federal governments. The client base is mainly composed of retirement villages, resorts and building properties.

You are a mature age candidate and enjoy selling into the retirement market. A knowledge, and passion, of renewable energy would be an added extra. Salary is \$50,000 + super, + OTE of up to \$50,000.

If you are looking for your next step in the industry of the future then call **Julien Lacave** or **Michael Green** or submit your resume.
