

wind farm construction – site owner representative

- **Wind Farm Projects**
- **24 Month Contract**

This organisation is a dynamic force in the energy market, delivering innovative solutions throughout Australia, Asia and the Middle East. With over 250 specialist staff they provide their clients with access to specialist consultancy and design expertise in all areas of the energy and power industries, including renewable energy projects such as wind and biomass. Services include strategic advice to utilities and independent power producers, technical and feasibility studies, project and construction management, asset management services, long-term planning and integrity studies for the electricity, oil and gas industries.

You will join the company on an initial 18 to 24 month contract to work on two sites in regional NSW and WA. You will represent the owner at the site and be involved in contract management, client reporting and work force organisation.

You are an experienced project engineer with significant background experience in civil construction and in the power sector in Australia, you will be asked to stay on sites until the completion of the projects. You are a qualified engineer with a proven track record in project engineering and project management, with hands-on site experience, contractor and work force management and working to strict deadlines.

To discuss this unique opportunity call **Julien Lacave** or submit your resume.
