

# wind project planner

- **Major Wind Project**
- **Above Market Salary Negotiated**
- **International Candidates Considered**

This major wind developer is building a project team for a recently established project. They have a major Australasian and international presence so please view this role as a long-term career move.

Reporting to the General Manager you will interface with members of the multi-functional project team and consortium partners to maintain project documents. Your role is to construct full lifecycle programs including civil, electrical, environmental, consents, energy supply analysis and supply chain integration. In addition you will develop and manage project control methodologies and manage and maintain the project risk register.

You are able to read technical drawings, setting of baselines, updating and controlling multiple projects. Experience of resource planning, critical path analysis and risk management is required. You have a broad range of project programming skills and have a proven track record in major construction projects preferably in the wind industry.

To discuss this exciting opportunity please call **Trevor Jones** in Auckland, **0011 64 274 304 162**.
